

A MESSAGE FROM THE COUNCIL PRESIDENT

I would like to apologize for the technical difficulties that we experienced last night at our Council Meeting. The Select Morrisville, LLC presentation for the Williamson Park Town Center is an important presentation and a large portion of concerned residents were unable to hear the presentation due to an audio problem.

The Borough Manager will be working to ensure audio is working properly and to create a system that allows virtual participation from the public to be integrated into our broadcast capabilities.

Former Councilmember Dave Nay recorded last night's Council Meeting independently of our broadcast. We will also be using that video to post on the Borough's communication platforms.

Again, I apologize for the technical difficulties as we strive to do better moving forward. Thank you.

**Ted Parker
Council President**
